

bark stopper

INSTRUCTIONS

CAUTION

1. Insert battery into the battery compartment matching the polarity
2. When the item is not in use for a long period of time, remove the battery and store in a cool or dry place
3. This item is not a toy – keep away from children

Battery Installation

1. Slide battery cover away from unit
2. Install 9V battery, and replace battery cover (Battery not included)

Operation

1. Switch unit to “On” (Power switch is located on the right side)
2. Unit will automatically detect barking and emit an ultrasonic high pitch
3. To adjust the sensitivity level, slide the switch between “Low” and “High”
 - A. Low setting : will detect barking up to 13ft away
 - B. High setting : will detect barking up to 16ft away
 - C. Barriers such as walls, doors, or windows will limit the receiving range

Important Note:

- If your pet’s barking pitch is very low, the device may not activate
- Dog Training takes time and patience. Your dog’s barking behavior will calm down over time
- It is recommended to use this on dogs starting 6 months and up

Wall Mount Installation

1. Remove main unit from holder
2. Place holder against wall surface and mark both holes with pencil
3. Drill small hole using a 1/8” drill bit
 - A. For wood installation : simply use small wood screw for installation
 - B. For hollow wall installation : make sure to use the appropriate drill bit and appropriate wall anchor for your screw
 - C. It is suggested to mount the unit at a height that the dog(s) cannot reach to prevent damage.

FCC

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.
